

Next Steps:

Please create the figma mockup shared with you. Keep the following things in mind when creating this webpage.

Figma link: <https://bit.ly/2Gw8AWr>

1. Our website uses Tailwind css. <https://tailwindcss.com/>. It'll be great if you can use this to create this page.
2. The webpage needs to be responsive and dynamic. (Make sure it doesn't break when resizing the browser)
3. Breadcrumbs need to be added to the webpage to ensure a good UX. It's not in the mockup, but please add that wherever you see fit ensuring to provide a good user experience. (E.g. Breadcrumbs can be [Vena > Solutions > Project.](#))
4. All CTAs are pop-up forms.
5. The first product feature needs to be a carousel image (with 3 product screenshots). The images can be reused.

6. Feel free to change padding on certain modules, and it could be (purposely) off for certain elements. Make sure it is consistent across the website.
7. Please keep accessibility in mind when working on the mockup
8. Your code will be reviewed internally. Please make sure all code is original with **NO** assistance from the Vena website.

*Please note: This challenge is for review and evaluation purposes only. Vena will not be using the work that has been produced in this challenge. *
